

Division of Health Professions
Radiography Program
Student Handbook
2026 to 2027

Welcome to the Radiography Program sponsored by Bergen Community College. We are pleased to have you as part of the Radiography Program. This program is one of eleven disciplines within the Division of Health Professions.

The Bergen Community College Radiography Program has a diverse number of clinical education centers that afford our students with an extensive experience with a wide variety of patient conditions, imaging cases, and equipment. Presently, we have several clinical education centers located in the northern New Jersey area.

Our energized laboratory is located on the first floor of the Health Professions Building. It has state of the art imaging technology that consists of digital imaging and computed radiography. The x-ray laboratory affords the opportunity to learn, apply, and perfect skills that are essential for the clinical education aspect of the radiography curriculum. Our lab is equipped with an energized x-ray unit, computed radiography processor, digital portable x-ray machine, 6-computer stations with related software, and a large variety of imaging phantoms.

It is crucial that these documents are properly maintained for the duration of the program.

We wish to welcome each of you to the program and hope for your success in all of your educational endeavors.

Best,

Professor Tyrone C de Leon, [M.Ed.](#), R.T.(R)(ARRT)
Radiography Program Director

Accreditation Agencies

Bergen Community College is accredited by the Middle States Association of Colleges and Schools.

The radiography program is accredited by the Joint Review Committee on Education in Radiologic Technology (JRCERT) and New Jersey Radiologic Technology Board of Examiners (NJRTBE).

The radiography program adheres to the Standards of an Accredited Program in Radiologic Sciences as published by the Joint Review Committee on Education in Radiologic Technology. Students are provided a copy of this document in their manual.

Mission Statement

The Bergen Community College Radiography Program cultivates graduates who possess knowledge, clinical competence, ethics, and meet the needs of a diverse community. The program uses engagement and collaboration to help instruct radiography principles that are integral to health care.

The radiography program is a 24-month course of study that is designed to prepare the graduate for employment in the medical imaging profession. Radiographers use radiation to create radiographs of the human body for the medical doctor to diagnose disease. A study of anatomy, patient care, imaging equipment, technique, and radiation biology are integrated into each course. Students learn principles related to medical imaging and apply these to practice in clinical settings. The program has three components - classroom, laboratory, and off site clinical education. Students spend approximately 1700 hours in clinical practice. Upon completion of the program students are eligible to apply for certification examination with the American Registry of Radiologic Technologists (ARRT) and apply for state licensure (if a license is required for that particular state.)

The radiography program at Bergen Community College is accredited with the Joint Review Committee on Education in Radiologic Technology and the New Jersey Radiologic Technology Board of Examiners. This ensures that our graduates will be eligible for the American Registry of Radiologic Technologists certification examination in Radiography.

Program Goals and Outcomes

Upon completion of the program, our students will be prepared to:

1. Students and graduates will be academically and clinically competent.
2. Students and graduates will speak and write in a professional manner.
3. Students and graduates will use critical thinking strategies to solve academic and clinical issues.

Student Competency

1. Students will demonstrate competent patient positioning skills in a clinical setting.
2. Students will demonstrate competent equipment use in a clinical setting.
3. Students will demonstrate skills in radiation protection in a clinical setting.

Communication

1. Students will demonstrate effective use of the AIDET model on verbal communication.
2. Students will demonstrate effective written communication with the public and their peers.

Critical Thinking

1. Students will use critical thinking strategies to solve issues with imaging cases.
2. Students will demonstrate the ability to analyze and modify exposure to meet the needs of a patient.

Curriculum Learning Objectives

1. Use professional oral and written communication.
2. Demonstrate knowledge of human structure, function, and disease.
3. Provide patients with the proper level of care and comfort.

Professional and Technical Standards of Practice

The applicant for admission to the Bergen Community College Radiography Program should have the following technical skills to perform procedures competently, proficiently, and safely:

1. The student must be able to read and interpret patient information in charts, electronic medical records, or physician orders.
2. The student must be able to communicate in English in order to converse with and instruct patients to relieve anxiety and gain their cooperation during procedures.
3. The student must be able to hear a patient talk in a normal tone from a distance of 20 feet.
4. The student must be able to observe the patient in order to assess the patient's condition and/or needs from a distance of at least 20 feet.
5. The student must be able to render services and/or assistance to all patients depending on the individual patient's needs and ability in moving.
6. The student must be able to push, pull, and lift 50 pounds.
7. The student must be able to stand for long periods of time, while wearing a protective apron, and be able to walk a distance of a minimum 2 miles during a normal clinical day.

Upon completion of the appropriate instruction, the student must be able to:

1. Safely move a stretcher and/or wheelchair without injury to self, patient, or others.
2. Safely manipulate mobile imaging units, turning corners, getting the unit on and off an elevator, and manipulating the unit inside the patient's room.
3. Manually move the x-ray machine and manipulate the tube at standard and nonstandard heights and angles up to 7 feet.
4. Draw sterile contrast media and other solutions without contaminating the syringe, needle, or sterile field.
5. Select exposure factors by manipulating dials, buttons, switches, and electronic devices.
6. Place an image receptor in Bucky trays and imaging devices.
7. Properly manipulate all equipment locks.
8. Physically administer emergency care including CPR.
9. Evaluate radiographic images to make certain that radiographs contain proper identification and are of diagnostic value.

Professionalism Policy

Unprofessional/unacceptable behaviors include:

1. Academic or clinical dishonesty, such as cheating, plagiarism, or knowingly furnishing false information to the college or clinical site.
2. Falsification, forgery, alteration, or misuse of college, instructor, and/or affiliate documents, records, or identification.
3. Any disruption of class sessions by use of abusive / obscene language, disorderly, or threatening behavior.
4. Insubordination (defined in Webster's Dictionary as "unwilling to submit to authority; disobedient; rebellious").
5. Fighting at the clinic site or on college premises.
6. Being intoxicated or under the influence of drugs or alcohol while on clinical assignment or college premises. (Refer to the drug and Alcohol policy)
7. Misuse of clinical affiliate equipment or supplies.
8. Sleeping while on duty at a clinical assignment.
9. Failure to adhere to any duly established BCC Radiography Program policy or protocol following appropriate counseling.
10. Inappropriate communication or breach of confidentiality, HIPAA violations
11. Negligence in patient care situations, seriously jeopardizing patient safety

Radiography Program Policies and Requirements

Buckley Amendment (Privacy Policy)

Bergen Community College's Radiography Program informs students of the Family Educational Rights and Privacy Act of 1974. The program maintains strict confidentiality practices of all clinical and didactic information. Your records are locked in secured areas. This act is designated to:

- Protect the privacy of education records.
- Establish the right of students to inspect and review their education records.
- Challenge the content of their education records.
- Have a hearing if the outcome of the challenge is unsatisfactory, to submit an explanatory statement for enclosure in the record if the outcome of the hearing is unsatisfactory.
- Prevent disclosure, and to secure a copy of the college policy, which includes the location of all education records.
- Have the right to file complaints about issues concerning alleged failures of the college to comply with the act.

<https://bergen.edu/currentstudents/student-consumer-information/ferpa/>

Complaints may be sent to the following address:

Family Educational Rights and Privacy Office (FERPA)
Department of Education
Room 4511
Switzer Building
Washington, D.C. 20202
Phone (202)-655-4000

Program Grade Assignment Policy

Letter grades for each radiography course as assigned as follows:

- A - 92% to 100%
- B+ - 89% to 91.9%
- B - 83% to 88.9%
- C+ - 80% to 82.9%
- C - 77% to 79%
- D - 75% to 76.9%
- F - 74.9% and below

Program Completion Time

The admitted student **MUST** complete the program within a maximum of 3 years from the start of the program.

Successful Course Outcome Policy

The minimal passing grade for all Radiography courses is 77%. Numerical final grade averages that are less than 77% are unsatisfactory and require the course to be repeated. In the event that any two radiography courses are unsuccessful during the program, the student will be dismissed from the program.

Students have a three-year timeframe to complete the program in its entirety. Students who are dismissed from the program must repeat the entire admissions process including prerequisites, criminal background check, and admissions assessment.

Non Continuation of the Program

Students who are unsuccessful with one radiography course, may continue with the program after waiting one year due to the sequential order of the courses in the radiography curriculum. The unsuccessful course **MUST** be repeated to obtain a passing grade.

Students wishing to return after 1 year or more out of the program: Students are expected to complete the program within 3 years. Students who leave the program for more than 1 year will be required to start over. Students must write a letter of intention of your return to the program by 10/15 of the current year.

Graduation Requirements Policy

In order to graduate from this program, the student must meet all of the following requirements:

1. Completion of all Radiography courses with a final grade of at least 77%.
2. Maintain a C average and a cumulative GPA of at least a 2.5 throughout the program.
3. Completion of all General Education courses.
4. Completion of all required clinical competency evaluations.
5. Pass a First Year Comprehensive Examination at the end of RAD-283 with a score of 80% or higher.
6. Pass a Second Year/Exit Examination at the end of RAD-291 with a score of 80% or higher

First Year Comprehensive Examination Policy

This examination is administered at the end of RAD 283. Content will be derived from topics covered in the Fall and Spring semesters. These include topics from RAD 180, RAD 181, RAD 276, and RAD 281.

Second Year/Exit Examination Policy

Upon completion of RAD 291, the radiography student will take an Exit Examination. Content will be derived from all courses taught in the past 24 months. Students who do not meet the minimum threshold of an 80% on this examination will not meet the requirements for graduation. An incomplete(INC) grade will be given to the student until a successful attempt is made.

INC Grades (Academic and Clinical Grades)

Although this handbook addresses academic issues, clinical performance affects your ability to graduate and be signed off for the registry. All mandatory competencies must be completed before starting ANY continual and terminal evaluations.

All mandatory competencies, electives, continual and terminal evaluations must be completed by the end of RAD 290. If competency evaluations are not completed, the student who earns an Incomplete must sign a contract with the Clinical Coordinator agreeing to the conditions and periods of the contract.

The Clinical Education Coordinator, sets the minimal number of competencies in all categories for each term based on state and ARRT requirements.

ARRT and State License Application

Graduating candidates will complete an application to the ARRT no earlier than 90 days prior to program completion. The program director will verify that you are within the 90 day time frame and that you have successfully met your objectives. Tentative scheduling of your examination will be based on successful completion of clinical and didactic requirements and the conferral of your degree by Bergen Community College.

Proof of degree completion is required for the ARRT and state licensing agencies.

Repeating Radiography Courses Policy

Students who are unsuccessful with a radiography course grade must repeat the course when the course is offered again. The student is advised that they may not progress in the program until the failed course is successfully repeated. Should the repeat of a course yield the second F grade, the student will be permanently dismissed from the program.

Please note that the failure of any two radiography courses, at any time, results in the permanent dismissal from the program.

Withdrawal, Readmission, Academic Forgiveness and Academic Appeal Policy

Academic Forgiveness and Academic Appeal are two policies that must be completed with the collaboration of an academic/personal counselor and the Office of Enrollment Services. Students must be apprised of the college calendar and official withdrawal dates. Students who seek Forgiveness or a Grade/Academic Appeal for a radiography course may NOT re-enter the program.

Students who choose to completely withdraw from the program may do so by the stipulated college deadline only. However, should the student choose to do so, he/she must reapply for admissions if the student would like to return. Re-application is due by no later than 10/15 of the current year. The applicant will have to complete the criminal history background check and the Radiography Admissions Examination again with no guarantee of readmission.

The program must be informed in writing of intent to return by 10/15 of each year.

If readmitted into the program, the student will have to retest all technical skills in the laboratory in the presence of the laboratory instructor. The technical skills must be passed before the student may be permitted to attend clinical education courses. The rationale is to assure the maintenance of knowledge, competency and safety.

Assessment Policy

The use of any electronic devices including, but not limited to, cell phones, smart watches, earbuds/headphones, or Bluetooth devices) is prohibited. Students may use an approved personal computer/tablet and calculator during the assessment. Use of an unauthorized device is considered a breach of academic integrity and is reported to the Program Director and College.

Under no circumstance is the copying, photographing, or distribution/disclosure of content permitted.

Students are subject to disciplinary action as outlined by the college's code of conduct. <https://bergen.edu/student-conduct/student-code-of-conduct/>

Late Arrival Policy During Testing

Students who arrive late will not be admitted into the testing area. The faculties feel that late arrivals unfairly disturb the students who arrived on time and are diligently working at the task. Be advised that any makeup test format will vary from the original assessment. The academic test writing is the prerogative of the instructor.

Course Attendance Policy

Students are expected to be present for each class and laboratory session. Students are expected to arrive on time. Poor attendance and tardiness is an unprofessional behavior and will not be tolerated. Poor attendance can affect your ability to meet course and program objectives.

More than two absences per course is considered excessive. Students may present a signed physician's or lawyer's note for consideration of an extenuating circumstance.

Trajecsys Clinical Tracking Application

Registered students will utilize Trajecsys clinical application as part of their clinical education. Students are required to register for the use of Trajecsys by the end of September in their first year of education. Items such as grades, clinical evaluations, and attendance will be monitored. It is the student's responsibility to purchase access to Trajecsys as soon as it becomes available. The cost of access is \$150 plus taxes and fees for two years.

Medical Insurance Requirement

Proof of medical insurance must be given to the Office of Health Services. Any medical charge incurred at a clinical facility is the responsibility of the student.

The college may offer low-cost medical insurance plans. It is the student's responsibility to determine eligibility.

<https://bergen.edu/health-wellness-and-personal-counseling/health-services/health-insurance-requirements/>

Student Maintenance of Medical Records Policy

Students must have a physical examination and immunizations prior to the start of clinical. There are no exceptions to this policy. Those students who are not in compliance will not be able to participate in clinical education. Each day a student misses will be recorded as an unexcused absence.

Medical records will be maintained in the Bergen Community College Health Office. It is the student's responsibility to keep their medical requirements and records up to date each semester. A medical clearance letter will be provided to the program's clinical education coordinator prior to the start of each semester.

Professional Liability Insurance Requirement

Bergen Community College requires all Health Professional students to carry his or her own professional liability insurance. Students must provide the clinical education coordinator proof of insurance prior to the start of any clinical activity.

<https://www.hpsso.com/>

For legal and safety compliance, students are to be at the assigned clinical site during the times stated. Students must be supervised by a Bergen Community College Clinical Preceptor or designee.

CPR Policy

Students must be certified in "CPR-BLS for Healthcare Professionals/Providers." Completion certificates must be from an American Heart Association approved course prior to the beginning of clinical education. A copy of the card must be provided to the program's clinical education coordinator. Cards are maintained as a part of the student's clinical education folder.

<https://cpr.heart.org/en/cpr-courses-and-kits/healthcare-professional/basic-life-support-bls-training>

Compliance with the American Society of Radiologic Technologists: Code of Ethical Practice Policy

The ASRT hyperlink is included as part of the student's professional handbook. The program reinforces the content throughout a student's educational experience.

https://www.misericordia.edu/uploaded/images/academics/mi/other_links/mi_codeofethics.pdf

New Jersey State Licensure Requirements Policy

A New Jersey state licensure is required for employment in the capacity of a radiographer. Graduates are not permitted to work in that capacity without a valid state license.

Upon successful completion of the ARRT examination in Radiography, graduates may apply for a New Jersey State license through the following:

<https://nj.gov/dep/rpp/tec/diagrt.htm>

Student Work/Employment Policy

Students are not to schedule their work during scheduled radiography lectures, laboratory, or clinical times. Any employment at a clinical site off hours is allowed to involve taking any radiographic images. Failure to abide by this policy will result in the dismissal from the program.

Communicable Disease

The purpose of this policy is to prevent exposure to and manage communicable diseases and infection to prevent its spread to others. Medical examinations and immunization requirements must be met. These include, but are not limited to, FDA/CDC recommendations for Covid shots and mandatory annual Flu shots.

The program must be informed immediately whenever the student discovers a communicable condition. If this occurs at the clinical education center, the student will be dismissed from clinical participation. Students are responsible for seeking appropriate medical attention.

Students may participate in clinical education when a medical clearance note from a physician is received by the Clinical Education Coordinator.

In the event a student comes down with a communicable disease, the Clinical Education Coordinator and the school nurse MUST be informed.

Workplace Safety Practices Policy

Students are introduced to factors involved in various workplace hazards in RAD 180-Introduction to Radiography. Any injury from chemicals, water, electrical, or blood borne pathogens is brought to the attention of the compliance officer and the Department of Health Services for evaluation. The nurse-in-charge will decide if care at one of our local community hospitals is warranted for injuries of any kind.

Radiation Safety Practices Policy

Freshmen students will be introduced to radiation safety during orientation. Subsequently, concepts of radiation safety are reinforced in all academic and clinical courses. Professor de Leon, serves in the capacity of Radiation Safety Officer for the program. Specific policies relating to the use of dosimeters and allowable exposure amounts are in the Clinical Handbook. All students are given one dosimeter to wear for clinical and laboratory classes. Dosimeters must be worn at all times in a radiation-producing environment and must be changed on a regular basis. It is the responsibility of the student to bring, wear and exchange the dosimeter to the laboratory and clinical education center. A student is not allowed, for safety reasons, to participate in clinical or lab activities without a dosimeter.

Students are allowed an effective dose limit of 100 mrem (1mSv) annually. Student's radiation dosimeter reports are available for student review and are maintained by the Radiation Safety Officer indefinitely. Students will be notified of their most recent dosimeter report within thirty (30) days of report receipt by the school.

In the event that a student receives an exposure of 50 mrem (0.5 mSv) or greater on any monthly radiation dosimetry report, or 100 mrem (1.0 mSv) or greater on any bimonthly radiation dosimetry report, or 150 mrem (1.5 mSv) or greater on any quarterly report, or an exposure that exceeds any of the occupational limits in N.J.A.C. 7:28-6.1, the school shall begin an investigation to find the cause and prevent recurrence of the exposure. The investigation report shall be completed within 30 calendar days of the school's receipt of notification of the exposure. This investigation report shall include any action to be taken to reduce unnecessary radiation exposure. The investigation report shall be given to the student and shall be maintained in the student's file. If any of the occupational limits in N.J.A.C. 7:28-6.1 is exceeded, a copy of the investigation report must be submitted to the department. Within 90 calendar days of departure from the school, the school shall provide each student with a complete record of his or her radiation exposure history.

Pursuant to Subchapter 19 discussing Radiologic Technology, the NJDEP requires under 7:28-19.12 the following provisions:

1. Ensure that students are not in the primary beam
2. Students are not permitted to remain in the x-ray room outside the control booth during an x-ray exposure unless the student is provided with a protective apron or shield that is at least 0.5 mm of lead equivalent; or
3. Students are not permitted to engage in any other practices likely to result in unnecessary exposure to ionizing radiation.

Students are not permitted to hold an image receptor during any radiographic procedure.
Students are not permitted to hold patients for any reason during an exposure.

Bergen Community College students MUST wear lead when doing portables. Non-compliance will result in a two week suspension from clinical practice.

Magnetic Resonance Imaging Safety

Students are provided an orientation regarding MRI screening and safety prior to the start of clinical. Students are made aware that due to the nature of the MRI equipment, access to specific locations within the clinical setting will be limited in nature or completely restricted. Students are allowed to assist with patients located in MRI zones I & II.

Completion of an MRI screening form is required prior to the start of a student's clinical rotation. Should a student's MRI clearance change, they are to notify the program and complete an updated screening form. All MRI screening forms will be held in the student's personal record on file.

Smart Electronic Devices and Cellular Phone Usage Policy

The use of cellular phones/electronic devices in the classroom is distracting to the instructor and other students, and, therefore prohibited during all class, laboratory, and clinical sessions, unless the student has an accommodation from the Office of Special Services.

There is to be no texting or use of the phone to peruse the internet while in class. Cell phones and texting is prohibited in the clinical site as well.

Once entering the classroom and or clinical education center, cell phones MUST be turned off and kept in a designated place (to be determined by the instructor) during the classroom or clinical site. If you are found to be using this device or any electronic devices during lecture, class, exam, lab, or clinical time, this is considered as insubordinate behavior by the program and you will be asked to leave. If the student becomes argumentative, Public Safety will be called.

Jury Duty Policy

Students who are called for jury duty must take their summons to the Program Officials upon receipt of the summons. Delay in bringing the summons to the proper attention may jeopardize the chances of being excused by the court and will create academic hardships for the student.

Military Services Policy

Those students, who are presently in Military Service, must inform the Program Director and Clinical Education Coordinator.

When a military student is called to duty, they must: (1) inform the program officials, and (2) present documentation of the dates that their service is needed.

Program Dismissal

Causes for permanent dismissal from the radiography program are the result of:

1. Act(s) of insubordination.
2. Serious, illegal acts; unethical actions and behaviors that violate the Code of Ethics.
3. Unsafe clinical practices, negligence or incompetence.
4. Health problems that interfere with the student's educational goals.
5. Misuse of the clinical education centers privileges.
6. Consistently failing to follow the program's policies.
7. Dismissal from clinical site(s).
8. Unsafe radiation or patient safety practices.
9. Cases of academic dishonesty.

A student who is dismissed from the Radiography Program for the violations listed above is deemed ineligible for readmission. The student has the right to appeal the decision by following the appeal process as outlined in the handbook and by Bergen Community College. Students who are dismissed from the program will receive a verbal and written notice of the dismissal.

Substance and or Alcohol Usage/ Abuse Policy

Students are not to attend clinic, classroom/ lecture, or laboratory activities when under the influence of alcohol, drugs, or any substances or medications not prescribed by a Physician.

The provision of client care in a safe and appropriate manner cannot be compromised at any time. The health and safety of affected students, other students, and others in the workers' clinical setting or laboratory setting cannot be jeopardized.

Bergen Community College has in place, personal counselors to help students who are encountering difficulty with prescribed, un-prescribed medication and alcohol usage. Sessions with these counselors are private and fully maintaining your privacy is protected by the law.

Radiography Program Chain of Command

A two-day period is needed to research the issue, event, or complaint. An electronic notification will be sent to you upon receipt of the response letter from the program.

The student's letter must contain only facts regarding the issue, not opinions or suspicions. Detailed facts such as dates, times and locations are needed for accurate investigation of the issue. Opinions are not to be included in any documents or forms.

Below is the chain of command to be followed for concerns regarding any academic/ clinical related issues:

1. Students must meet with the **instructor or preceptor** involved. An attempt must be made to try and rectify the problem or issue.
2. If there is no resolution and the issue is **clinical** related, the student is advised to make an appointment to meet with the **Clinical Coordinator**.
3. If there is no resolution, the student is advised to make an appointment to meet with the **Radiography Program Director**.
4. If there is no resolution, the student is advised to make an appointment to meet with the **Dean of Health Professions**.
5. If there is no resolution, the student is advised to meet with the **Vice President of Academic Affairs**.

Two days (2) after each meeting, or as soon as possible (feasible) an email with an outcome should be received. This is a worthwhile opportunity to potentially solve the situation/ issue or offer suggestions to you.

Reporting of Noncompliance Allegations with the Joint Review Committee in Education in Radiologic Technology

1. The JRCERT is required to be responsive to allegations of non-compliance with any of its standards.
2. Please be advised that the JRCERT cannot advocate on behalf of any one student.
3. An investigation into allegations of non-compliance addresses only the program's compliance with accreditation standards and will not affect the status of any individual student.
4. The JRCERT takes it seriously and follows up any allegation that an accredited program is not maintaining compliance with its accreditation standards.
5. Before the JRCERT will take action to investigate the program, however, it must be assured that the complainant has addressed the matter internally.
6. If you have addressed the matter internally and wish to make a formal complaint, please complete an allegations reporting form.
7. The allegations must reference the specific accreditation standards/objectives with which you believe the program to be in non-compliance.

Important Notes for Reporting Allegations Against a Program

1. The JRCERT cannot advocate on behalf of any student(s). An investigation into allegations of non-compliance addresses only the program's compliance with accreditation standards and will not affect the status of any individual student.
2. The investigation process may take several months.
3. The JRCERT will not divulge the identity of any complainant(s) unless required to do so through legal process.

Process

Before submitting allegations, the individual must first attempt to resolve the complaint directly with the program/institution officials by following the due process or grievance procedures provided by the program/institution.

1. Each program/institution is required to publish its internal complaint procedure in an informational document such as a catalog or student handbook.
2. If the individual is unable to resolve the complaint with the program/institution officials or believes that the concerns have not been properly addressed, he or she may submit allegations of non-compliance to the JRCERT:

Chief Executive Office

Joint Review Committee on Education in Radiologic Technology

Suite 250

20 North Wacker Drive

Chicago, IL 60606-3182

Phone (312)-704-5300

Email mail@jrcert.org

3. The allegations reporting form must be completed and sent to the above address with required supporting materials.

4. All submitted documentation must be legible.
5. Forms submitted without a signature or the required supporting material will not be considered.
6. If a complainant fails to submit appropriate materials as requested, the complaint will be closed.
7. The Higher Education Opportunities Act of 2008, as amended, provides that a student, graduate, faculty or any other individual who believes he or she has been aggrieved by an education program or institution has the right to submit documented allegation(s) to the agency accrediting the institution or program.
8. The JRCERT, recognized by the United States Department of Education for the accreditation of radiography, radiation therapy, magnetic resonance, and medical dosimeter educational programs investigates allegation(s) submitted, in writing, signed by any individual with reason to believe that an accredited program has acted contrary to the relevant accreditation standards or that conditions at the program appear to jeopardize the quality of instruction or the general welfare of the students.

BERGEN COMMUNITY COLLEGE RELATED ISSUES

Students must manage the situation with the faculty member.

<https://bergen.edu/student-conduct/studentcomplaint/>

Bergen Community College and the Radiography Program Accreditation and the JRCERT Standards

1. Bergen Community College is fully accredited by the Commission on Higher Education of the Middle States Association of Colleges and Schools.
2. The Bergen Community College Radiography Program is accredited by the New Jersey Radiologic Technology Board of Examiners (NJRTBE) and the Joint Review Committee on Education in Radiologic Technology (JRCERT)
3. All Radiography educational programs must follow the Standards of an Accredited Program in Radiologic Sciences.
4. The Standards are posted in the classroom and laboratory, and may be made available to the student upon request.
5. Issues of non-compliance with the Standards must be brought to the attention of the Program Director.
6. The program will immediately act to investigate the allegation(s)
7. If found to be in non-compliance, the program will take immediate action for correction. Corrective action will take place within 30 days of the initial report.
8. Issues of non-compliance with the Standards should be addressed or reported with the following agencies:

Joint Review Committee on Education in Radiologic Technology
20 North Wacker Drive
Suite 2850
Chicago, Illinois, 60606-3182
312-704-5300
mail@jrcert.org

New Jersey Radiologic Technology Board of Examiners
Department of Environmental Protection
Bureau of X-Ray Compliance
P.O. Box 415
Trenton, New Jersey 08625
609-984-5890

Criminal Background Check and Policy

The student is advised that CHBCs are required by The Joint Commission, the accreditation body to which our clinical education centers must adhere to. All students are required to complete a criminal background check prior to being accepted into the program.

1. This is required by the clinical education affiliates as is required by their external accreditation agency.
2. Issues of non-compliance will adversely affect the student's ability to graduate from the program.

Potential Infractions of the CHBC

The student is apprised that any infractions that result in a change of the CHBC status must be reported to the Dean of Health Professions and the Radiography Program Director. Such infractions could affect your opportunity to:

1. Continue the clinical education experience.
2. Be deemed eligible for the certification examination sponsored by the American Registry of Radiologic Technologists.
3. Be deemed eligible for a NJ State License provided by the Department of Environmental Protection and Bureau of X-Ray Compliance and NJ Radiologic Technology Board of Examiners.

It is imperative that the student maintains a "clean" record while in the program and graduation. Violations could affect ARRT eligibility, licensure/certification renewal, and potential work opportunities.

Ethics

Students are bound by the ARRT Code of Ethics and the ASRT Standard of Practice. The program has adopted the code of ethical practices and policies pertaining to student behavior from the ARRT/ASRT. Enrollment in Bergen Community College Radiography Program constitutes an agreement to comply with the policies of the school, program, and clinical sites. Regulations affecting admission, promotion, and other policies may be changed at any time by the program faculty and will apply to all students. Students will be notified in writing and required to sign acknowledgement of any policy changes. The program adheres to the Family Education Rights and Privacy Act of 1974. The program does not release any student information to parents or any agency without a signed release of information for the student or a court subpoena for the information. Family Education Rights and Privacy Act (FERPA) and Federal Trade Commission guidelines are followed.

AMERICAN REGISTRY OF RADIOLOGIC TECHNOLOGISTS (ARRT) CODE OF ETHICS

1. The Radiologic Technologist acts in a professional manner, responds to patient needs and supports colleagues and associates in providing quality patient care.
2. The Radiologic Technologist acts to advance the principle objective of the profession to provide services to humanity with full respect for the dignity of humankind.
3. The Radiologic Technologist delivers patient care and service unrestricted by concerns of personal attributes or the nature of the disease or illness, and without discrimination, regardless of sex, race, creed, religion, or socioeconomic status.
4. The Radiologic Technologist practices technology founded upon theoretical knowledge and concepts, uses equipment and accessories consistent with purpose for which they were designed, and employs procedures and techniques appropriately.
5. The Radiologic Technologist assesses situations; exercises care, discretion and judgment; assumes responsibility for professional decisions; and acts in the best interest of the patient.
6. The Radiologic Technologist acts as an agent through observation and communication to obtain pertinent information for the physician to aid in the diagnosis and treatment management of the patient and recognizes that interpretation and diagnosis are outside the scope of practice for the profession.
7. The Radiologic Technologist uses equipment and accessories, employs techniques and procedures, performs services in accordance with an accepted standard of practice, and demonstrates expertise in minimizing the radiation exposure to the patient, self and other members of the health care team.
8. The Radiologic Technologist practices ethical conduct appropriate to the profession and protects the patient's right to quality radiologic technology care.
9. The Radiologic Technologist respects confidences entrusted in the course of professional practice, respects the patient's right to privacy, and reveals confidential information only as required by law or to protect the welfare of the individuals or the community.

10. The Radiologic Technologist continually strives to improve knowledge and skills by participating in continuing education and professional activities, sharing knowledge with colleagues, and investigating new aspects of professional practice.

Academic Dishonesty Policy

The radiography program has a zero-tolerance policy regarding issues related to academic dishonesty. Students will receive a zero for infractions to this policy. This failing grade will be factored into the weight of the quiz, test, or examination that is published on the course syllabus. Refer to the policy in the BCC Catalog regarding Academic Integrity & Consequences.

No test, quiz, or examination is to be printed, photographed, or copied in any way. Students who compromise this policy will receive a zero or F grade. The program has a zero-tolerance policy for academic integrity infractions.

Our “on-line” platform, Canvas, web enhanced classroom, instructional and testing format, tracks all student activity with dates, times, computer number, IP address etc. It can deliver a history of what a student accessed, how many and what kind of attempts were made to access material posted on the Canvas course rooms. This includes, but is not limited to all exams, quizzes and powerpoint lecture presentations. Any access to any material that the student was not given permission for, or any unauthorized access to any exams, printing or saving of exams or exam content will be considered academic dishonesty and subject to program dismissal.

Academic integrity is challenged when a student is charged with academic irregularities, such as cheating during an examination or plagiarism in the preparation of an essay, laboratory report, or oral presentation.

The program will adhere to BCC Policies regarding academic regulations as found in the pages named academic dishonesty in the 2026-2027 College Catalog.

Videotaping, Audiotaping and Social Media

Students are to abide by the college's social media policy and the clinical affiliate policy. These are designed to protect yourself as well as the institution. Using social networking sites and creating unprofessional posts may be viewed as harassment, slander, or defamation. Social media networks must be used carefully while in the program and professionally. It is in violation to record a person without their consent. Future employers may use social media in their interviewing or hiring process. The program is often contacted for references post-graduation.

The Radiography Program supports the use of social media to reach audiences important to the Program such as students, prospective students, faculty, and staff. The College presence or participation on social media sites is guided by college policy. This policy applies to radiography students who engage in internet conversations. Distribution of sensitive and confidential information is protected under HIPAA and FERPA whether discussed through traditional communication channels or through social media.

Social media is defined as mechanisms for communication designed to be disseminated through social interaction, created using highly accessible and scalable publishing techniques. Social media is commonly thought of as a group of Internet-based applications that are built on the ideological and technological foundations of the web that allows the creation and exchange of user-generated content. Examples include but are not limited to LinkedIn, Wikipedia, Second Life, Flickr, blogs, podcasts, RSS feeds, Twitter, Facebook, YouTube, and Myspace.

While this policy may need to be modified as new technologies and social networking tools emerge, the spirit of the policy will remain the protection of sensitive and confidential information. Social media often spans traditional boundaries between professional and personal relationships and thus takes additional vigilance to make sure that one is protecting personal, professional, and program reputations.

As students, you will want to represent the Radiography Program and the school in a fair, accurate and legal manner while protecting the brand and reputation of the institution. When publishing information on social media sites, remain cognizant that information may be public for anyone to see and can be traced back to you as an individual. Since social media typically enables two-way communications with your audience, you have less control about how materials you post will be used by others.

Policy:

1. Protect confidential, sensitive, and proprietary information: Do not post confidential or proprietary information about the school, program, staff, students, clinical facilities, patients/clients, or others with whom one has contact in the role of a Radiography student.
2. Respect copyright and fair use. When posting, be mindful of the copyright and intellectual property rights of others and of the College. For guidance, visit the College Library.

3. Do not use Bergen Community College or Radiography Program marks, such as logos and graphics, on personal social media sites.
4. It is expected that during clinical times, cell phones and other personal forms of electronic devices will not be used.
5. No personal phone conversations or texting are allowed at any time while in patient/client areas or in the lab or classroom.
6. Use of computers (PDAs, Notebooks, etc.) during class shall be restricted to note taking and classroom activities. Use otherwise is distracting for not only the student involved in the activity but those in the immediate area/vicinity.
7. No student shall videotape/ photograph professors or fellow students for personal or social media use without the express written permission of the faculty or fellow student. At NO time shall patients/clients be videotaped or photographed. Lectures and any documents or powerpoint presentations are the property of the instructor, Bergen Community College or the published book or paper referenced. Therefore, any photographing, copying, reprinting or any other disseminating manner of those materials is strictly prohibited without written permission. Permission for audio or video recording of lectures is at the instructor's discretion.
8. Be aware of your association with Bergen Community College and the Radiography program, in online social networks. If you identify yourself as a student, ensure your profile and related content is consistent with how you wish to present yourself to colleagues, clients, and potential employers
9. HIPAA/Privacy guidelines must be followed at all times. ANY identifiable information concerning clients/clinical rotations must not be posted in any online forum or web page nor taken from the institution, such as the patient's name, information on history, including images.
10. Ultimately, you have sole responsibility for what you post. Be smart about protecting yourself, and others privacy, and most especially confidential information.

Procedure/Considerations:

There is no such thing as a "private" social media site. Search engines can turn up posts years after the publication date. Comments can be forwarded or copied. Archival systems save information, including deleted postings. If you feel angry or passionate about a subject, it is wise to delay posting until you are calm and clear-headed. Think twice before posting. If you are unsure about posting something or responding to a comment, ask your faculty. If you are about to publish something that makes you even the slightest bit uncertain, review the suggestions in this policy and seek guidance.

Future employers hold you to a high standard of behavior. By identifying yourself as a Bergen Community College student through postings and personal web pages, you are connected to your colleagues, clinical agencies, and even clients/patients. Ensure that content associated with you is consistent with your professional goals.

1. Radiography students are preparing for a profession that provides services to a public that also expects high standards of behavior.
2. Respect your audience.

3. Adhere to all applicable college and program privacy and confidentiality policies.
4. You are legally liable for what you post on your own site and on the sites of others. Individual bloggers have been held liable for commentary deemed proprietary, copyrighted, defamatory, libelous or obscene (as defined by the courts).
5. Employers are increasingly conducting Web searches on job candidates before extending offers. Be sure that what you post today will not come back to haunt you in the future.
6. Monitor comments. You can set your site so that you can review and approve comments before they appear. This allows you to respond in a timely way to comments. It also allows you to delete spam comments and to block any individuals who repeatedly post offensive or frivolous comments.
7. Do not use ethnic slurs, personal insults, obscenity, pornographic images, or engage in any conduct that would not be acceptable in the professional workplace.
8. You are responsible for regularly reviewing the terms of this policy.

Consequences:

1. Violations of patient/client privacy with an electronic device will be subject to HIPAA procedures/guidelines and consequences.
2. Students who share confidential or unprofessional information do so at the risk of disciplinary action that includes dismissal from the program.
3. Each student is legally responsible for individual postings and may be subject to liability if individual postings are found defamatory, harassing, or in violation of any other applicable law. Students may also be liable if individual postings include confidential or copyrighted information (music, videos, text, etc.).

Sexual Harassment

Sexual Harassment is defined as unwelcome sexual advances or sexually explicit comments. Bergen Community College is committed to providing all students and employees an environment free from sexual harassment or discrimination. As stated in the College catalog, the College and the Radiography Department deems sexual harassment in any form as prohibited, unprofessional and unacceptable behavior and in violation of Title VII of the Civil Rights Acts of 1964 and 1990, as amended, Title IX of the Education Amendments of 1972, and the New Jersey Law Against Discrimination, established case law and State Policies. Additional information regarding Bergen Community College Sexual Harassment Policy is published in the 2016-2017 College Catalog under Policies Prohibiting Sexual Harassment.

Professional Attire, Appearance, and Actions

Students must:

1. Act in a professional manner while in the classroom, laboratory or clinical site
2. Treat each other professionally and with respect at all times.
3. Wear your uniform to all classes including lectures and labs. Identification badges that include your full name and title as a radiography student is required.
4. You must also wear closed toe, clinical uniform acceptable shoes in the lab.
5. Hair must be up and fastened. Any non-naturally occurring hair color is not accepted.
6. Beards MUST be well groomed (it may be necessary for men to shave beards so that the N-95 masks will make a good seal to the face).
7. Maintain high levels of personal hygiene including uniform cleanliness.
8. Tattoos must be covered if possible. Tattoos on arms can be covered by sleeves, lab coat or long sleeve shirt if appropriate.
9. Earrings either must be of the stud type. No hanging, open or dangling type of earrings.
10. It is suggested that necklaces not be worn; however, if a student chooses to wear a "chain" that it be secured under a shirt and not accessible. These pose a potential choking hazard when working with patients.
11. Imitation nails, extensions, tips, gels, wraps, may not be worn to clinical. Refer to Clinical Coordinator and Clinical policies.

Classroom Etiquette Policy

Due to the nature of the course of study, it is essential to maintain a professional climate at all times while in class. This includes

1. the use of cell phones,
2. talking relentlessly,
3. passing notes,
4. disturbing faculty and other students,
5. frequently leaving the classroom,
6. failure to follow instruction and directions

Since these behaviors affect the education and learning climate, the disruptive student will be asked to leave.

Program Obligations Policy

The radiography program is a full-time course of study. Clinical and academic courses are scheduled Monday-Friday, for two years (24 months). Students are made aware of the course times in web advisor and verbally by the faculty. Each year, students are afforded 9 weeks vacation per year see list below for planning purposes. It is understood that you must work. This is not under the program's control. The program must follow national standards and state regulations. Some radiography laboratory sections run until 5 pm. It is the student's option to register for late afternoon courses. The amount of time is not to exceed 40 hours/ week.

Breaks

1. Winter Break (December/Jan)
2. Spring Break (March)
3. Approximately one week between spring and summer terms
4. Approximately three weeks in August

Student Responsibility Policy

Students enrolled in a college program are responsible to keep track of their earned grades. Students are afforded an opportunity to review prior assessments as long as the process remains educational and non-argumentative. Students must keep on them, at all times, the course syllabus, which gives grading weight values so that the student can tabulate their grade and process throughout the courses.

Instructor Response Time for Courses

Instructors will routinely read electronic mail correspondences.

A reasonable response time frame is 1-2 days. Please speak with your instructor regarding their individual response times.

In order to afford a timely and accurate response for tests and examinations, faculty reserves the right of a response timeframe of seven days.

Pregnancy Policy Statement

1. The disclosure of pregnancy on the behalf of the student is **voluntary**; however, it must be in writing. Students may withdraw, in writing, the pregnancy disclosure at any time.
2. It is strongly recommended that female students disclose their pregnancy status to the Program Director and Clinical Education Coordinator.
3. They can obtain the necessary monitoring devices to ensure a safe pregnancy during clinical rotation.
4. The radiography program complies with the policy of the New Jersey Radiologic Technology Board of Examiners regarding pregnant students in an accredited training program in New Jersey.
5. No pregnant student should receive a radiation dose of more than 0.5 REM(5.0 mSv)/ 9 months gestation or 0.05 REM(0.5 mSv)/ month.
6. All students shall wear whole body dosimeters when utilizing radiation-producing machines. This practice must be strictly enforced with respect to pregnant students. The relative risk to the embryo/ fetus should be thoroughly explained to students prior to the actual operation of x-ray machines.
7. NRC #8.13 "instruction concerning prenatal exposure" and NCRP # 91 protection of the fetus-embryo is used for reference.
8. The NJRTBE recommends that adequate controls and monitoring be instituted to assure that the dose complies with the ALARA principle.
9. The radiation safety officer will review the student's radiation exposure reports to assure compliance with the indicated dose limits.
10. The student will be provided the option to continue the BCC Radiography program without modification.
11. Provisions shall be made for re-entry into the program, when the student takes a leave of absence.
12. All didactic and clinical education requirements as mandated by the program must be completed.
13. A student may notify the Program Director of her pregnancy by submitting a completed Pregnancy Declaration Form.
14. The student will be provided the option for written withdrawal of the declaration.
15. A student's declaration of pregnancy is voluntary. A physician's note supporting the student's chosen option must be presented to the Program Director at the time of declaration.

**Bergen Community College
Division of Health Professions
Radiography Program**

Voluntary Pregnancy Declaration Form

Last Name: _____

First Name: _____

Date: _____

I have read the policy states indicated. Before completing this form, I have contemplated and discussed the options posed. I have met with the Program's appointed Radiation Safety Office and have chosen the following option:

- ☐ To withdraw immediately from the program AND return after the conclusion of the pregnancy.
- ☐ To continue with didactic courses and discontinue clinical education until the conclusion of the pregnancy.
- ☐ To request a leave of absence and return in the next appropriate semester in the curriculum.
- ☐ To remain in the clinical and didactic portions of the program during the pregnancy until the conclusion of the pregnancy.

I understand that I have the right to withdraw this declaration form at any time. Please initial here: _____

Student Signature & Date: _____

Radiation Safety Officer & Date: _____

Student Acknowledgement

1. By signing this document, I agree to abide by the terms here stated and published in the policy.
2. Any aspect of the policy is subject to change. Students will be informed both verbally and through written communication.
3. I am aware that photography by any means for any purpose, including the use of a portable device and camera is prohibited. Imaging of tests or other private materials is strictly prohibited. Infringements will be reported to the Dean of Health Professions and Dean of Student Judicial Affairs.
4. Cell phones and other non-essential electronic devices are not to be used for any assessment. In the event that an instructor observes the utilization of alternative devices during an assessment, the instructor will forfeit the assessment grade and will receive a zero. The incident will be added to the student's academic record and referred to the Program Director.
5. I further acknowledge that if I do not understand any policy or portion of this document, I am able to ask the Program Director and/or Clinical Education Coordinator for further clarity.

Please be advised that ALL policy and course requirements may be subject to revision on a semester-to-semester basis. Students will be notified of ANY revisions at the beginning of the semester in which the change is being implemented. This will take place at the first meeting of the semester.

**Bergen Community College
Division of Health Professions
Radiography Program**

Student Handbook Acknowledgement Form

I have read the handbook and agree to:

- ☐ Comply with all program policies, accreditation benchmarks, and state requirements as stipulated in this manual.
- ☐ Maintain compliance with the published policies and that failure to comply is considered insubordination.
- ☐ Adhere to the radiography curriculum and that the failure of two radiographic courses will lead to my dismissal from the program.

My signature below validates that I have been given the opportunity to read the entire student handbook, understand, and agree to comply with the policies and regulations.

Printed Student's Name: _____

Signature: _____

Date: _____

Estimated Student Expenses

- Textbooks - \$1,000
- Uniform including patches (Two sets) - \$200
- Student Name Tag - \$20
- n95 Fit Test (clinical site specific) - \$50
- Trajecsys Clinical Reporting System (2 year access) - \$150
- Clover Learning RadTech Bootcamp (Senior year academic license) - estimated cost \$280
- Kettering National Seminar (Senior year, summer) - \$295
- Initial ARRT Registry Examination - \$225
- Tuition Cost - [Tuition and Fees](#)
 - \$236.35 in county per credit hour
 - \$414.95 out of county per credit hour
 - \$433.00 out of state per credit hour

Course Description

RAD-180 Introduction to Radiography:

In this course, the healthcare system and the radiography profession are studied. Specific topics related to patient care management include communication, medical law, ethical practice, vital signs, basic pharmacology, infection control, transfer techniques, medical equipment and emergencies are addressed.

RAD-181 Radiography 1:

This course introduces the study of radiography. The theory and application of positioning of the chest, abdomen, and upper limb will be explored. Basic principles of radiation protection and radiographic exposure and medical terminology will be reinforced in class and in the laboratory.

RAD-182 Radiography Practicum 1:

This course is designed to introduce the student to the physical layout and operation of a department of radiology. This course requires the performance of some routine examinations under the direct supervision of a registered radiographer and a college clinical instructor. The student rotates throughout three affiliated hospitals during this experience.

RAD-276 Principles of Imaging Equipment:

This course orients the student radiographer to the fundamental principles, operation, and application of radiation-producing imaging equipment used in diagnostic imaging. Topics in this course include atomic structure, radiation, diagnostic x-ray circuit, tomography, image intensification, mobile and automatic exposure control units. Radiation safety and patient care principles are reinforced.

RAD-281 Radiography 2:

This course continues the study of radiographic procedures. The theory and application of positioning of the lower limb, spinal column, and an introduction to the contrast studies will be explored. Principles of positioning techniques, exposure, and critique will be explored in the laboratory.

RAD-282 Radiography Practicum 2:

This course requires students to spend two clinical days a week in a radiology department where students will perform routine as well as some complex examinations under the direct supervision of a registered radiographer and a college clinical instructor. Procedures performed are evaluated on the basis of a competency-based clinical education system.

RAD-280 Principles of Image Production and Acquisition:

This course involves the study of the theoretical and practical aspects of image creation. The photographic, geometric, and imaging systems will be explored. Evaluation of changes caused in the radiographic image with equipment and recording systems, demonstrated, and discussed. Also included in this course are the basic concepts of the origin and effects of ionizing radiation on the patient and radiographic image.

RAD-283 Summer Radiography Practicum:

This course requires students to spend two clinical days a week in a radiology department where students will perform routine as well as some complex examinations under the direct supervision of a registered radiographer and a college clinical instructor. Procedures performed are evaluated on the basis of a competency-based clinical education system.

RAD-183 Radiographic Pathology:

This course is a survey of medical and surgical diseases designed to acquaint the student with changes caused by diseases that have a relation to the scope of medical and imaging diagnostics.

RAD-285 Radiography 3:

This course continues with the study of radiographic procedures, theory, and application of basic skull, advanced skull, an overview of the management and care of trauma, geriatric and pediatric patients. It also includes a study of contrast agents typically utilized and their respective radiographic examinations. This course includes a component of faculty guided independent study of medical terminology.

RAD-286 Radiography Practicum 3:

This course requires the performance of routine, complex, and advanced X-ray procedures under the supervision of a registered radiographer and college clinical instructor in a Radiology Department. Students spend 16 hours a week for 15 weeks meeting the established requirements for competency based clinical education.

RAD-288 Radiography 4:

This course incorporates three major areas of study - radiation protection, computed tomography, and sectional anatomy. There will be an introduction to sectional anatomy. The use of computer software programs will also be used in the laboratory.

RAD-289 Radiography Practicum 4:

This course requires the performance of routine, complex, and advanced X-ray procedures under the supervision of a registered radiographer and a college clinical instructor in a radiology department. Students spend 24 hours per week for 15 weeks meeting the established requirements for competency based clinical education. Rotations into specialty areas and elective rotations are also begun.

RAD-290 Advanced Radiography Practicum:

This course involves the performance of routine, complex and advanced radiographic procedures under the supervision of a registered radiographer and college instructor in the radiography department. The students will spend twelve [12] weeks meeting the established requirements for a competency-based clinical education. The specialty elective rotations will continue. Upon completion of all required radiography core and clinical competency based

requirements, the students are eligible to apply to the ARRT for the radiography certification examination.

RAD-291 Essential Skills for Radiographic Practice

This capstone experience culminates with the professional development of entry-level radiologic technologists. The students will be meeting the established requirements for a competency-based education. A comprehensive overview of topics involved with becoming a registered radiologic technologist and career opportunities are provided. Students are demonstrating their abilities through guided simulations on patient care, radiologic positioning, and image acquisition.
