# Data Boxes Report

## FOREWORD

In the portfolio of Bergen Institutional Research reports, the Data Boxes Report truly stands alone. While its unique structure and bevy of information make it one of IR's most interesting annual data offerings, it's the origin of the Data Boxes that makes it so special. Unlike the Fact Book, the Data Boxes Report is not a traditional and expected institutional research output. There is no federal or state mandate for it like there is for the IPEDS Graduation Rate Report or the Middle States Institutional Profile. It also does not align with any initiative like the National Benchmarking Project or Achieving the Dream.

What makes the Data Boxes Report so different is that it came about because of a need – the need for streamlined and simplified data about degree programs. It was departments across Bergen clamoring for a snapshot of a degree program's basic stats that brought about the report. Now in its fourth iteration, it continues to be one of the most popular IR reports and it is easy to see why.

If Bergen degree programs had baseball cards, they would look a lot like the Data Boxes. Short of some kind of pictorial representation, both relate straightforward statistical information over a period of time. In the case of a baseball card, it lists a player's hits, home runs, and batting average and in the case of the Data Boxes, it lists a program's enrollment, graduates, and transfers. A Sports Management Rookie Data Box might not be as valuable as a Ken Griffey Jr. Rookie Baseball Card, but the analogy holds up even when discussing the limitations and shortcomings of both.

While batting averages and enrollment numbers are pertinent information, they do not tell the whole story. Ken Griffey Jr.'s impact on the game of baseball cannot adequately be summed up in a baseball card much like a program's impact on a graduate's life cannot be captured in a Data Box.

When consuming and disseminating the Data Boxes Report, it is important to remember what is presented here and what is not. Let it serve as the first step in the conversation about Bergen's degree programs – a necessary step, but just the first of many.

## INTRODUCTION

Data Boxes were originally made in order to streamline the ability to look at both a program’s enrollments and degrees awarded in one chart. Transfer data were then added to include another outcome for the program. Each Data Box includes enrollment information for the past five fall semesters, number of degrees awarded for the past five academic years, and number of students who transferred from the program to another 2-year or 4-year college over the same 5-year period. Fall enrollment in a program is based on 10<sup>th</sup> day numbers where a student needs to be enrolled on the 10<sup>th</sup> day of the semester in order to be counted in the enrollment snapshot. Graduation numbers are based on the SURE Graduation file. Each graduation year contains three separate graduation dates as follows:

2013 Graduates	2014 Graduates	2015 Graduates	2016 Graduates	2017 Graduates
August 2012	August 2013	August 2014	August 2015	August 2016
December 2012	December 2013	December 2014	December 2015	December 2016
May 2013	May 2014	May 2015	May 2016	May 2017

Transfer numbers are based on the student’s active program during his/her last registered term at BCC before he/she transferred. These students transferred either in the same fiscal year as their last term or the next fiscal year<sup>1</sup>. Transfer institutions can either be 2-year or 4-year institutions and transfer students do not include any students who graduated from BCC in fiscal years 2013, 2014, 2015, 2016, or 2017.

Throughout this report, boxes for closed programs (i.e. programs that are no longer accepting new students) are shaded to denote this distinction.
